EMDR PROTOCOL FOR RECENT CRITICAL INCIDENTS (EMDR-PRECI) & EMDR INTEGRATIVE GROUP TREATMENT PROTOCOL (EMDR-IGTP)

Early EMDR therapy intervention has a natural place in the disaster mental health continuum of care context and may be key after other traumatic events as a brief treatment modality. Use of early EMDR therapy can result in the adaptive processing of trauma memories, the prevention of the accumulation of negative associated links, and the reduction of suffering and later complications. Thus, it promotes mental health and resilience, especially during ongoing trauma. This workshop will focus on integrating into clinical practice two EMDR therapy protocols designed for early intervention that are part of the United Nations Institute for Training and Research (UNITAR) course for Peace Operations Personnel and Humanitarian Aid Workers. Within the context of Psycho-Oncology these protocols address the psychological dimensions of cancer: the ongoing traumatic stress responses of patients, their families and caretakers at all stages of the disease.

The **EMDR Integrative Group Treatment Protocol (EMDR-IGTP)** has been used in its original format, or with adaptations to suit the cultural circumstances, in numerous places around the world for thousands of survivors of natural or man-made disasters. Nine pilot field studies and case reports with children and adults after natural mass disasters in Mexico, Nicaragua, El Salvador, Colombia and Venezuela have documented its effectiveness with children and adults after natural or man-made disasters, during ongoing war trauma, ongoing geopolitical crisis, with war refugees, work accidents that produce Acute Stress Disorder, victims of severe interpersonal violence, cancer patients and Latin American armed forces.

The **EMDR Protocol for Recent Critical Incidents (EMDR-PRECI)** was developed in the field to treat critical incidents (e.g., earthquakes, flooding, and landslides) that were related to stressful events that continued for an extended period of time (often more than six months) and where there is not a post-trauma safety period for memory consolidation. There is evidence supporting the efficacy of the EMDR-PRECI in reducing symptoms of posttraumatic stress in adults and maintaining those effects despite ongoing threat and danger in a disaster mental health continuum of post-incident care context and as an early intervention for traumatized first responders working after a human massacre and as an early intervention for a technological disaster survivors. It appears that EMDR-PRECI helped to prevent the development of chronic PTSD and to increase psychological and emotional resilience.

WORKSHOP OBJECTIVES

- Describe the rationale and integrate the use of the EMDR-IGTP for Children.
- Describe the rationale and integrate the use of the EMDR-IGTP Adapted for Adolescents and Adults Living with Ongoing Traumatic Stress.
- Describe the rationale and integrate the use of the EMDR-PRECI.

WORKSHOP LOCATION

Tukwila Community Center
12424 – 42nd Ave South
Tukwila, WA 98168
206-767-2322

WORKSHOP AGENDA

Saturday-May 6, 2017

8:00-8:30am	Registration/Coffee Service
8:30-5:30pm	Workshop
12:00-1:30pm	Lunch Break

CONTINUING EDUCATION

7 Professional & EMDRIA CE CREDITS

Attendance at entire workshop required to receive credit.

APA: EMDR Institute is approved by the American Psychological Association to offer continuing education for psychologists. EMDR Institute maintains responsibility for this program and its contents.

NBCC: EMDR Institute has been approved by NBCC as an Approved Continuing Education Provider, ACEP No. 5558. Programs that do not qualify for NBCC credit are clearly identified. EMDR Institute is solely responsible for all aspects of the programs.

RN: EMDR Institute is a provider approved by the California Board of Registered Nursing, Provider Number 9755.

SW: EMDR Institute, provider #1206, is an approved provider for SW continuing education by the Assoc of SW Boards (ASWB) www.aswb.org, through the Approved Continuing Education (ACE) program. EMDR Institute maintains responsibility for the program. Social workers participating in this course will receive 7 ce hours.

BBS: For CA this workshop meets the qualifications for 7 hours of ce credit for LPCC, LMFT and LCSW as required by the CABBS. Approval #PCE270.

EMDRIA: EMDRIA Credit Provider #99003 is approved by EMDRIA to offer

This workshop is held in facilities in accordance with the Americans with Disabilities Act. Please notify the EMDR Institute and the hotel if special accommodations are required.

PRESENTER

Ignacio Jarero, PhD, EdD, who specializes in humanitarian programs for early EMDR therapy intervention, has conducted seminars in over 64 countries, and has provided field services in Latin America, the Caribbean, Spain and South Asia to natural or human-provoked disaster victims, family members of those deceased, and first responders.

Dr. Jarero is an EMDR Institute & EMDR-Iberoamerica Senior Trainer of Trainers for Latin America & the Caribbean and has received the EMDR-Iberoamerica Francine Shapiro Award, the International Critical Incident Stress Foundation International Crisis Response Leadership Award, the EMDR Colombia Jaibaná Award for Humanitarian Work, the Argentinean Society of Psychotrauma (ISTSS Affiliate) Psychotrauma Trajectory Award.

He is a Mental Health Advisor for the Mexican Department of Defense and Air Force, Navy, and National Human Rights Commission and World Vision International.

Dr. Jarero is EMDR Mexico Co-Founder, Latin American & Caribbean Foundation for Psychological Trauma Research (Francine Shapiro Award Winner), Founder & President, International Center of Psychotraumatology, Founder & President, Iberoamerican Journal of Psychotraumatology and Dissociation, Co-Founder & Editor in Chief, and the Mexican Association for Mental Health Support in Crisis (AMAMECRISIS, NGO), Founder & President.

WORKSHOP REQUIREMENTS

Completion of EMDRIA approved
EMDR Part 1/Weekend 1 Training

Current research is limited to the application
of EMDR to trauma-related disorders.
